SUMMARY

1 ½ years of experience in FP&A, financial analysis, and financial reporting across high growth SaaS, tech companies. Automated variance analysis, annual planning, and financial reporting workflows using AI and Python to drive process improvement efforts

SKILLS

Technical: Excel, Python, R, PowerBI, SQL, Audit Board, AI, NetSuite, Anaplan, Word, PowerPoint, FactSet

EXPERIENCE

Finance Operate Consulting Analyst – Deloitte, San Francisco, CA

Sep 2026 – Current

- Incoming, starting in September 2026

FP&A, Financial Analyst Intern – Workato, Palo Alto, CA

Sep 2025 – Apr 2026

- Modeled \$275M+ expenses from 60 cost centers enabling variance analysis for actuals vs forecast vs budget for FP&A VP
- Automated 40K+ data pipelines through Python, reducing manual processes by 75% during Annual Planning
- Uncovered \$100K of redundant AI spend by analyzing \$300M+ in PO and card transactions, leading cross-spend analytics
- Built dashboards on 500K+ transactions to visualize \$20M of spend trends and vendor concentrations for 10+ executives
- Conducted testing during process migration to Anaplan, identifying bugs and verifying core financial model functionality

Financial Analyst Intern – Intapp, Palo Alto, CA

Jun 2024 – Jun 2025

- Prepared 10-K/Q's, financial statements, EPS, and earnings, while ensuring GAAP standards were met across 4 reporting periods
- Consolidated 500+ award calculations to report approximately \$37M to create SEC filings for public financial reporting
- Forecasted 7000+ future grant expenses of \$25M and EPS impact of 0.25 for stock compensation disclosure for FP&A
- Evaluated technical SEC disclosures to determine appropriate inclusion/exclusion criteria and draft exact regulatory language
- Allocated \$15M in earnout expenses for acquisition and managed 50+ internal controls for compliance and audit

Financial Analyst Intern – AfterQuery, Remote

Apr 2025 – May 2025

- Created 60 QA datasets from reports to enhance downstream financial modeling workflows for YC backed startup
- Implemented 20+ financial scenarios for stocks and 30 ratio driven metrics to improve financial analysis training data

Tech Sales Intern – Exclusive Networks, San Jose

Oct 2023 – Jun 2024

- Managed \$90M sales portfolio in the US East to evaluate 75 leads to secure high potential revenue opportunities
- Achieved 20% conversion rate from Juniper global accounts by conducting 60 hours of outreach for business partners

PERSONAL PROJECTS

Quantitative Finance Research Assistant

- Built Python scenario-based derivatives risk analysis tool visualizing potential future return distributions across S&P 500 stocks, and modeling potential payoffs using CVaR, while collaborating with former World Bank Consultant

Predictive Modeling Retail Sales Project

- Iterated through 43,000 data models to obtain optimal performance metrics across 10,600 training sets to narrow to 5 specific models for financial forecasting. Devised time series models to forecast retail sale trends for Queensland AUS

Machine Learning Boston Home Pricing Project

- Achieved 78% predictive power for model using random forest, stepwise regression, and KNN data mining algorithms to predict price variability. Aggregated datasets of 7000+ observations to uncover drivers and variability of housing prices for Boston

EDUCATION

California Polytechnic State University, San Luis Obispo (Cal Poly)

Completed: Jun 2025

Bachelor of Science, Business Administration, **Finance and Quantitative Analysis**

Minors: Statistics and Law
